## NOTHING'S FRIENDLIER TO THE ENVIRONMENT.

### SUSTAINABLE MATERIALS

- No old growth wood is used in the manufacture of MiraTEC trim. It is made from wood that has no commercial timber value and is the byproduct of other operations. This leftover wood is also detrimental to the overall vitality of the forest.
  - >> All wood comes from an area within a 150-mile radius of the Towanda, PA production facility.
  - >> JELD-WEN® uses 100% northern hardwoods, which include maple, beech, oak and other species.
- MiraTEC trim is treated with zinc borate, an EPA-registered biocide and a naturally occurring earth mineral that is environmentally safe and ensures protection against termites.

### NO ADDED UREA FORMALDEHYDE

- MiraTEC trim has no added urea formaldehyde. This is certified by Scientific Certification Systems under certificate number SCS-NAUF-01802.
- Through repeated testing by the Composite Panel Association (CPA), MiraTEC trim has demonstrated formaldehyde emissions equivalent to background levels found in the environment.

### COMPLIES WITH CARB

- MiraTEC trim is acknowledged by the California Air Resources Board's (CARB) Airborne Toxic Control Measure (ATCM) 93120 to utilize exempt status ultra-low emitting formaldehyde (ULEF) resins.

### LOW VOC PRIMER

- Primed 4 sides with an ultra-low VOC, primer containing a mildewcide.

### CONTRIBUTES TO GREEN BUILDING PROGRAMS

- MiraTEC trim contributes to industry programs such as LEED and the National Green Building Standard.
