

Endurance[®]

ORIGINAL RAIL[™]

1

ENGINEERED STRENGTH

The aluminum stiffener adds strength and support to the vinyl profile and runs the length of the top and bottom lineals.

2

SECURE INTERLOCKING BRACKET COMPONENTS

Endurance Original brackets install simply by attaching the body of the bracket to the mounting surface and then snapping the bracket covers into place over the fasteners. Snap-fit design ensures a secure fit and clean appearance.

3

EASY STAIR INSTALLATION

No-cut stair brackets install easily to accommodate 32-38° angles. Bottom stair brackets include quick-fit inserts to accommodate low and high stair angles; no complicated measuring or cutting.

ORIGINAL RAIL[™]

4

EASY-INSTALL INNOVATIVE BRACKET SYSTEM

Endurance Original Rail systems feature 2-piece top and 3-piece bottom level brackets for quick and easy installation. All level and stair kits include brackets in addition to a full line of accessory brackets that are available.

5

LED LIGHTING OPTIONS

Add some ambiance with our selection of LED lighted post caps, stair/side lighting, dome lighting, flush-deck lighting, or LED Under-Rail lighting. Lighting components install quickly and easily with our plug and play lighting system.

6

COLOR AND STYLE

Choose from square, turned, round aluminum or glass slat kits (glass slats are sold separately from kit). Select your rail kits in White, Earth or Dune.
