

E-PECK®

NATURAL CYPRESS PECKY LOOK

E-PECK® SOUTHERN PINE COLONIAL

Pecky cypress is a rare and highly prized wood. The unusual “pecky” pattern is caused by a fungus that attacks the heartwood of mature cypress trees, creating an effect of pocketing and striation. When the cypress timber is milled, the natural grooves and divots create a very unique and rustic look.

Because of the growing scarcity of pecky cypress, we developed a proprietary process that re-creates the rare pecky appearance consistently throughout each plank. **E-Peck®** is available in Red Grandis or Pine.

Synergy Wood® manufactures pre-finished wood paneling for ceilings and walls used by homeowners and contractors, eliminating the unforeseen challenges of finishing wood at the jobsite. Our products create a warm and inviting space for our customers to enjoy for years to come.

- ✓ Prefinished: No Sanding, Staining or Finishing On-site
- ✓ Color Selection and Project Estimating Simplified
- ✓ Reduces Skilled Labor at Jobsite
- ✓ V-Joint & Nickel Joint T&G with End Matching
- ✓ Proudly Handcrafted in America
