DURATECH
CAPPING TECHNOLOGY

Looking for a beautiful painted porch without the maintenance? Aeratis Traditions is an uncolored board that can be painted or stained in any color. Unlike the Heritage, line which can also be painted, Traditions flooring must be painted or stained and is sold at a price point competitive to wood at the time of install (see aeratis.com for price comparison chart).

When painted, Aeratis Traditions maintains a 5-A paint adhesion, the strongest paint adhesion in the industry (no priming needed). When Traditions is installed and painted with a recommended paint, the paint for the installed porch is provided FREE in the form of a rebate*.

Introducing the first-ever, historically accurate, synthetic beaded ceiling product that can be installed 24" on center. The Traditions beaded ceiling is paint-ready and double-sided, with 2 different styles to choose from. Made from the same formulation as our porch flooring, you will get the best performance available anywhere.

*See aeratis.com for complete paint rebate details

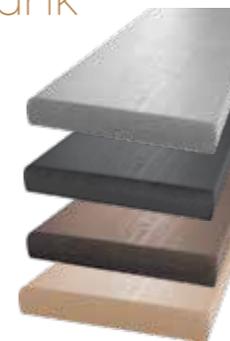

Aeratis Heritage

Aeratis Heritage comes in three pre-finished colors, with subtle, natural color variation to mimic the richness and color-depth of a painted or stained wood floor. It is designed to look like an unpainted, finished wood floor. What makes Aeratis Heritage truly unique is that the profile mimics Douglas Fir, IPE, and Mahogany. It is a true double-sided plank. With the most technologically advanced cap available in the industry.

Heritage is ADA slip compliant when it is wet or dry. This permits Aeratis Heritage and Legacy to be used in residential, commercial and government projects.

Universal Porch Plank

The Aeratis Universal Porch Plank, or UPP, is perfect for picture framing your installation, for using on stairs or even as a stand-alone wide-plank porch application.

Porch Trim

1" x 7/8"
Chamfer nosing

7/8" x 7/8"
Quarter-round

Aeratis Legacy

Aeratis Legacy is a 6" wide T&G porch plank. This board was engineered to match the wider planks used on many porches in the early 1800's. The wider plank cuts the installation time in half, and the built-in hidden fastener system provides additional cost savings on installation, as well as a more competitive cost per square foot.

The Aeratis Legacy product comes in the same 3 colors as Aeratis Heritage.

This revolutionary acrylic based cap is color matched with the core, making the cap virtually invisible. The DuraTech® cap surface rivals all available options in both hardness and slip resistance. The color retention is second to none and backed by Aeratis' Limited Lifetime warranty.

Aeratis Custom Shutters

Aeratis Custom Shutters are available in a box, pre-assembled any custom size and pre-finished. All shutters are accompanied by a Limited Lifetime warranty and are a fraction of the cost of wood shutters. Multiple types of hardware offered to make all shutters operable. Visit Aeratisshutters.com for details.

Product Details

Aeratis Porch Flooring is a solid extruded PVC tongue & groove porch plank proven to out-perform wood, polypropylene, polyethylene and open-cell PVC products.

Its unsurpassed durability, coupled with a historic, traditional design, fortifies the porch floor against nature's adverse effects, while standing up to the scrutiny of the most discerning traditional architects, builders, historic societies and homeowners.
