

Danny Heatherly

Second generation timber farmer Danny Heatherly started **BarkClad** 17 years ago in Western North Carolina – the heart of the Appalachian Mountains.

During that time, **BarkClad** in Asheville NC has built a reputation on delivering the highest-quality natural bark wood siding produced in Western NC and supplied across the United States and Canada, providing exceptional customer service every time.

All **BarkClad** bark wood siding is hand-peeled, hand-cut on-site, and carefully moved to a pallet where it is placed on slats and stacked for drying. Our 100% Made In The USA Tulip Poplar bark is then placed in a certified kiln and dried. Every piece is carefully cut using a special saw and loaded and banded on shipping pallets ready for delivery to your home. The entire BarkClad process occurs within 1 week or less to minimize damage, maximize flatness, prevent “muddy bark” and maintain the exceptional natural integrity of the bark.

NATURAL BARK

For more than **17 years**, **BarkClad** has been working with discerning contractors, developers, architects and suppliers across the U.S. and Canada to deliver superior natural bark siding.

At **BarkClad**, serving the Western NC area, our natural bark siding is from poplar and is hand-peeled, dried in a certified kiln, hand-cut on-site, stacked, loaded and shipped for delivery within a 1-week period or less to maintain the exceptional natural integrity of the bark. We call this the **BarkClad** process.

SMARTBARK

Poplar - SmartBark

Poplar - SmartBark

American Chestnut - SmartBark
High Hampton - Cashiers, NC

American Chestnut - SmartBark

INTRODUCING **SMARTBARK**, THE WORLD'S FIRST ENGINEERED BARK SIDING.

With multiple styles and colors to choose from our Engineered **SmartBark** Shingles allows developers, builders, architects and homeowners to create unique and realistic representations of natural bark. **SmartBark** provides the opportunity to clad your project in barks such as Poplar, Walnut and American Chestnut, not all of which are available naturally.

With an estimated installed savings of \$2 per sq. ft. compared to natural bark siding, **SmartBark** saves time and money without sacrificing style.

All **SmartBark** products are weather resistant. They are easy to install and don't require bug treatment or a special moisture barrier. **BarkClad's** exclusive 30-year limited warranty ensures your **SmartBark** siding will look beautiful for years to come.

SmartBark Poplar, SmartBark Walnut and SmartBark Chestnut are washable, paintable and flame resistant, and with an **R-value of 4.7 per inch**, **SmartBark** saves on energy costs year after year.
